

# savvyDesktop™

CLOUD SOLUTIONS

## Win over your users and CFO with a single decision

Collaborate on a CAD design from the airport. Run a meeting from the corner coffee shop. Virtual desktops allow access to corporate applications and files from any location with an Internet connection. savvyDesktop facilitates secure, anytime, anywhere productivity with reduced total cost of ownership.

## Planned obsolescence? That's so last year.

It doesn't always make sense to toss out hardware just because it has outlived its processing capacities. Keep your equipment active or allow users to BYOD through savvyDesktop, a consolidated desktop host that is accessible from any device, anytime, anywhere.

savvyDesktop can handle the demands of your most complex applications, even those that take up buckets of storage space or have special security needs. That's because we customize environments for each client, with virtual or onsite data center hosting.

**PLATFORM INDEPENDENT** Users connect through a browser on laptops, workstations or mobile devices, including PCs, Macs, iPads, Android tablets or smartphones, accommodating clients with varying user needs.

**CUSTOM CONFIGURATIONS** Considerations can be made for heavy-duty software or data encryption requirements, so sensitive data will be secure and accessible 24/7.

**START-TO-FINISH BUILDS** For clients who prefer to maintain an onsite server, we'll design a system that is standalone yet still secure.

**DROP-SHIP THIN CLIENTS** Ramp up new facilities or staff expansions with overnight shipments of thin clients that can be configured virtually for immediate operation.

## Who is ITsavvy? We are, of course.

**CURIOUS?** Contact an ITsavvy Client Executive to learn how savvyDesktop can save you money and secure your data.

### THE BENEFITS OF ITsavvy savvyDESKTOP

- **Reduced hardware costs**  
Use current desktops as terminals or purchase thin clients for cost control
- **Secured data**  
Storing data in a centralized, offsite location ensures business continuity, with encryption options available
- **It's green**  
Offsite data storage and backup consumes less space and energy
- **Automatic antivirus updates**  
ITsavvy is continually monitoring and abating the latest threats for information security
- **Automatic backups**  
Workloads are regularly backed up, taking responsibility off of employees
- **Super-fast onboarding**  
New employees can be up and running in 15 minutes, jump starting their assimilation and productivity
- **Optional 24/7 support desk**  
Relieve resource-strapped IT staff with virtual support or an ITsavvy-operated user help desk
- **Service you can trust**  
We've led the industry in virtual desktop management, so you can trust our technical expertise
